We like the stainless steel  
exterior, and their customer  
service has been very good.  
We also wired in a master  
cut-out switch, and note  
this is a 240V installation.  
We're using a 6kW Mr Steam  
150E generator. It's  
important to size your steam  
generator appropriate to the  
cubic foot size of the steam  
room.

And Distribution developed since 1930 and is very different from the traditional firetube boiler design that is the familiar steam train boiler image of the past. In a firetube boiler a large amount of water and steel is heated to produce steam. In the Clayton Steam generator a small amount of water and steel is heated to produce steam. The basic design concept results in a steam making machine with staggering advantages for today's world.
