Presents an introduction to the key project stages from conception through to completion of construction and then beyond to handing over the resulting structures and services for use. This book covers: project promotion, strategy and design; latest forms of contracts for construction; and partnering, aliancing and programme management.

Although the 6th edition of the ICE Conditions of Contract was published in 1991, copies of the 5th edition, for which there is still significant usage, are available.

The GBP1.2 billion Cairo Wastewater Project was designed to remove water from one of the world's largest and fastest growing cities and treat it to a standard permitting re-use for agriculture. This issue of ICE Proceedings contains nine refereed papers that cover various aspects of the planning, design, construction and management of the project.

The first history of the Institution of Civil Engineers to be illustrated in colour looks at the development of the profession over nearly 200 years and includes biographies of some of the greatest engineers who made these changes possible, charting the successes of construction from the great engineering advances of Victorian times to the Channel Tunnel Rail Link. A fascinating and informative read for all those interested in the history of ICE and how it has grown as well as the civil engineering industry and its impact on the world in which we live.

The forms of tender, agreement, conditions and bond published by the Institution of Civil Engineers have been designed to standardise the duties of contractors, employers and engineers and to distribute fairly the risks inherent in civil engineering.This classic guide to the contracts provides an authoritative reference, and also a rich and practi

Developed for the purpose of evaluating and controlling risk in major projects. This book demonstrates how to identify, analyse and mitigate risks and how to place financial values on them. It details a rigorous approach to risk management that can be applied to various types and stages of investments.

The ICE Design and Construct Conditions of Contract were originally published 10 years ago, this new edition updates the original contract with changes necessitated by new or amended legislation. As well as several substantial changes and numerous minor ones the contract has been carefully edited to improve its clarity and usability. ICE Design and Construct Conditions of Contract: 2nd edition is not a variant of the Measurement Version but an entirely separate set of conditions based on very different premises. ICE Design and Construct Conditions of Contract: 2nd edition radically departs from the normal ICE Conditions of Contract concept by making the Contractor responsible for all aspects of design and construction, including any design originally provided by or on behalf of the Employer. The Form of Tender provides for payment on a lump sum basis but other forms of payment may be used. This new edition of the Contract has been updated to include the benefits of team working and current procurement initiatives. If the procedures are followed, the parties to the Contract will be provided with an 'early warning' of circumstances that may give rise to additional costs or delay in completion of the Contract. The Contract has been revised and updated to deal with the following legislation: The Construction (Design and Management) Regulations 1994 The Housing Grants, Construction and Regeneration Act 1996 The Finance Act 1996 and the Landfill Tax Regulations 1996 The Contracts (Rights of third parties) Act 1999 The New Roads and Street Works Act 1991
