and international focus. These changes, coupled with a general intolerance of restrictions to competition, have led governments to reconsider the way they regulate the profession. Liberalization of trade in legal services takes place both at the multilateral level within the World Trade Organization ' s General Agreement on Trade in Services (GATS) and at the regional level within preferential trade agreements (PTAs). This book analyses the liberalization process that takes place at both levels. It is the first publication to undertake an in-depth analysis of the obligations contained in these agreements. Starting from an overview of the regulations related to legal services – and focusing on barriers to cross-border legal services that result from these regulations – the analysis goes a long way

towards pinpointing which regulations should be removed and which adopted or preserved in order to facilitate international trade in legal services. Insightful considerations explore the cross-border features of such elements as the following: cross-border mergers and acquisitions; intellectual property rights; new financial instruments; business-to-business dispute resolution mechanisms; business permits; company formation; tax burdens; regulatory compliance; transparency rules; residency and local presence requirements; restrictions on (e.g.) ownership, investment, entry, fee-setting, and advertising; and extension of accountancy disciplines to legal services. Noting that the most successful global law firms are not those that impose one single culture but rather those that harmonize many

unprecedented benefits for patients, cost challenges for payers, and profits for shareholders. As consumers and companies benefit from access to new drugs, policymakers around the globe seek mechanisms to control prices and expenditures commensurate with value. More recently the 1990s productivity boom of new products has turned into a productivity bust, with fewer and more modest innovations, and flat or declining revenues for innovative firms as generics replace their former blockbuster products. This timely volume examines the economics of the biopharmaceutical industry, with eighteen chapters by leading academic health economists. Part one examines the economics of biopharmaceutical innovation including determinants of the costs and returns to new drug

development; how capital markets finance R&D and how costs of financing the biopharmaceutical industry compare to financing costs for other industries; the effects of safety and efficacy regulation by the Food and Drug Administration (FDA) and of price and reimbursement regulation on incentives for innovation; and the role of patents and regulatory exclusivities. Part two examines the market for biopharmaceuticals with chapters on prices and reimbursement in the US, the EU, and other industrialized countries, and in developing countries. It looks at the optimal design of insurance for drugs and the effects of cost sharing on spending and on health outcomes; how to measure the value of pharmaceuticals using pharmacoeconomics, including theory, practical challenges, and policy issues; how

to measure pharmaceutical price growth over time and recent evidence; empirical evidence on the value of pharmaceuticals in terms of health outcomes; promotion of pharmaceuticals to physicians and consumers; the economics of vaccines; and a review of the evidence on effects of mergers, acquisitions and alliances. Each chapter summarizes the latest insights from theory and recent empirical evidence, and outlines important unanswered questions and areas for future research. Based on solid economics, it is nevertheless written in terms accessible to the general reader. The book is thus recommended reading for academic economists and non-economists, and for those in industry and policy who wish to understand the economics of this fascinating industry.

In Third Party Funding, Gian Marco Solas, for the first time, describes third party funding (TPF) as stand-alone practice within the wider litigation and legal markets. The book reports on legal issues related to TPF in both common law and civil law jurisdictions, and in the international context. It then discusses the incentives and economics of TPF transactions in different legal contexts while explaining how the practice emerged and how it is likely to develop. In addition, the book offers practical insights into TPF transactions and analyzes a number of regulatory proposals that could affect its use and desirability. This work should be read by scholars, practitioners, policymakers, and anyone else interested in how TPF is changing the practice of law.
