The author explores the essence of what it means to be a woman--in body and mind--as she shares her thoughts on everything from organs to orgasm and menopause

WOMAN explores the essence of what it means to be female. In mapping the inner woman - from organs to orgasms - Natalie Angier presents an extraordinary new vision of the female body as an evolutionary masterpiece. 'Anyone living in or near a female body should read this book' - Gloria Steinem 'Women have long been regarded as slaves to biology and evolution, prisoners in a hormonal swamp. But now, some of the sacred tenets of evolutionary psychology...have come under fresh challenge. As the century turns, it could be Goodbye women's lib; hello female liberation!... WOMAN is a delicious cocktail of estrogen and amphetamine designed to pump up the ovaries as well as the cerebral cortex' - Barbara Ehrenreich, TIME MAGAZINE 'Drawing on science, literature and history, Angier provides valuable insight into the power of hormones, breast milk and the all-important clitoris. A must for every woman's bookshelf' - WOMAN'S JOURNAL

"An awe-inspiring tour of nature" from a Pulitzer Prize–winning science writer (San Francisco Examiner). Natalie Angier has taken great pains to learn her science from the molecule up. She knows all that scientists know—and sometimes more—about the power of symmetry in sexual relations, about the brutal courting habits of dolphins, about the grand deceit of orchids, and about the impact of female and male preferences on evolution. The Beauty of the Beastly takes the pulse of everything from the supple structure of DNA to the erotic ways of barn swallows, queen bees, and the endangered, otherworldly primate called the aye-aye. Few writers have ever covered so many facets of biology so evocatively in one book. Timothy Ferris, author of the acclaimed Coming of Age in the Milky Way, says Angier is “one of the strongest and wittiest science writers in the world today.” “Like Alan Lightman or Lewis Thomas,” writes Nobel laureate David Baltimore, “she draws from science a meaning that few scientists see, and her writing takes on an unusual dimension of artistry.” And Sherwin Nuland, author of How We Die, believes that “Natalie Angier is in the tradition of the great nature writers.” “A gold mine.” —The New York Times “From cockroaches to cheetahs, DNA to elephant dung, Angier gives us intimate and dramatic portraits of nature that readers will find rewarding.” —Publishers Weekly

The New York Times bestseller that makes scientific subjects both understandable and fun: “Every sentence sparkles with wit and charm.” —Richard Dawkins From the Pulitzer Prize–winning New York Times science journalist and bestselling author of Woman, this is a playful, passionate guide to the science all around us (and inside us)—from physics to chemistry, biology, geology, astronomy, and more. Drawing on conversations with hundreds of the world’s top scientists, Natalie Angier creates a thoroughly entertaining guide to scientific literacy. For those who want a fuller understanding of some of the great issues of our time, The Canon offers insights on stem cells, bird flu, evolution, and global warming. For students—or parents whose kids ask a lot of questions about how the world works—it brings to life such topics as how the earth was formed, or what electricity is. Also included are clear, fascinating explanations of how to think scientifically and grasp the tricky subject of probability. The Canon is a joyride through the major scientific disciplines that reignites our childhood delight and sense of wonder—and along the way, tells us what is actually happening when our ice cream melts or our coffee gets cold, what our liver cells do when we eat a caramel, why the horse is an example of evolution at work, and how we’re all really made of stardust.

This updated edition of the bestselling Girls Think of Everything, by Sibert-winner Catherine Thimmesh and Caldecott Honor winner Melissa Sweet, retains all the integrity of the original but includes expanded coverage of inventions (and inventors) to better reflect our diverse and technological world. In kitchens and living rooms, in garages and labs and basements, even in converted chicken coops, women and girls have invented ingenious innovations that have made our lives simpler and better. What inspired these girls, and just how did they turn their ideas into realities? Retaining reader-tested favorite inventions, this updated edition of the best-selling Girls Think of Everything features seven new chapters that better represent our diverse and increasingly technological world, offering readers stories about inventions that are full of hope and vitality--empowering them to think big, especially in the face of adversity.

In this funny, outrageous and empowering book, Dr. Lissa Rankin answers all the secret gynecological questions that most women wonder about, but have always been afraid to ask. Suppose you had a wise, warm, funny best friend-who just happened to be a gynecologist. You're out with the girls for cocktails and the conversation turns to sex, and then to girly parts. One by one, you start asking her all the questions you've secretly wondered about-and discover that you have a lot in common. If you were to write those questions down, then you'd have What's Up Down There?, a life-changing little book that answers: - Do old ladies have saggy vaginas? - How do male gynecologists have a sex life without feeling like they're stuck at the office? - Is it normal for your inner labia to hang out of your outer labia? - Can the baby feel its mom having sex during pregnancy? - How common is it for one's boobs to be two totally different sizes? And so much more! As outrageously funny as it is empowering, this book reveals how to love yourself and your body-and will have you recommending it to every woman you know. From off-the wall sex questions to serious topics of women's sexual health, What's Up Down There? provides answers to women of all ages and stages.

Feminist City is an ongoing experiment in living differently, living better, and living more justly in an urban world. We live in the city of men. Our public spaces are not designed for female bodies. There is little consideration for women as mothers, workers or carers. The urban streets often are a place of threats rather than community. Gentrification has made the everyday lives of women even more difficult. What would a metropolis for working women look like? A city of friendships beyond Sex and the City. A transit system that accommodates mothers with strollers on the school run. A public space with enough toilets. A place where women can walk without harassment. In Feminist City, through history, personal experience and popular culture Leslie Kern exposes what is hidden in plain sight: the social inequalities built into our cities, homes, and neighborhoods. Kern offers an alternative vision of the feminist city. Taking on fear, motherhood, friendship, activism, and the joys and perils of being alone, Kern maps the city from new vantage points, laying out an intersectional feminist approach to urban histories and proposes that the city is perhaps also our best hope for shaping a new urban future. It is time to dismantle what we take for granted about cities and to ask how we can build more just, sustainable, and women-friendly cities together.

In Sitka, Alaska, a subarctic port surrounded by snow-dusted mountains, an aged Tlingit Indian woman engages local investigator Cecil Younger to look into her son's murder. The crime has long since been marked solved by the authorities. But what Younger unearths is a primal conspiracy to hide both the motive for the victim's killing as well as the true identity of the killer.
